

DYNARIAN (Roadmap)

English version / March 2021

DYNARIAN is a free open source project derived from Bitcoin, aiming to provide a long-term energy efficient, script-based cryptocurrency. Built on the foundation of Bitcoin, PPCoin, and NovaCoin, innovations like proof-of-stake and script will help further advance the cryptocurrency arena.

DYNARIAN (Roadmap)

English version / March 2021

03/20/2021

We have started to apply in different exchangers (we will inform you)

03/28/2021

We invite those interested to contact us through the WEB and send us their DYNARIAN Wallet address and an email to organize the Airdrop

04/09/2021

We will enable a community meeting channel on DISCORD.

04/16/2021

Those interested are invited to our live on Instagram (it will be in English) and we will explain the project.

05/01/2021

AIRDROP with the entire community, will be a live on Instagram (for COVID issues) officially launching the coin. On the same day we will make the open source code and details of PoW and PoS mining available to the community.

05/24/2021

The first decentralized POS project tool for any commercial use will be presented.

06/18/2021

The social actions of the foundation / association linked to the project will be made available to the community.
